

SYSTEMS AND METHODS FOR CROSS-
PLATFORM ACCESS TO A WAGERING INTERFACE

Abstract of the Disclosure

Systems and methods for providing a
5 consistent wagering interface to a variety of platforms
are presented. A wagerer may access wagering
information using a set-top box, computer, wireless
device, or telephone. A central database can be used
to store and maintain the wagerer's preferences for the
10 wagering interface, personal history, account history,
betting history, and default wagering selections. This
information may be consistent across interfaces on all
platforms or may be customized to each platform.
